Make or Model of
Forklift.

Custom Configuration to Your
Application

Ease of Adjustment to the
Comfort of Every Operator

Complete Terminal Replacement
in Less than a Minute

Rugged Design for
Maximum Reliability

RAM universal mounting hardware

The RAM universal mounting hardware system is the most flexible, easiest to install and maintain, and most reliable way to mount your mobile terminal products to date.

The RAM family of products allows the terminal or scanner products to be mounted virtually anywhere. This allows for maximum accessibility and a very user friendly installation.

With the wide variety of mounting hardware available, the perfect terminal mounting solution can be configured for your installation to allow for maximum driver visibility.

The cast on rubber covering over the mounting balls provide just the right amount of vibration isolation. The patented design utilizes a rubber ball and socket that greatly reduces the amount of vibration that can be transmitted into the electronics. No other mounting system on the market today offers this feature in a more durable, compact, and functional way. It is the perfect platform to stand up to the challenges of the factory floor environment.

The system installs in minutes, and allows for equipment change out in seconds delivering the utmost in system reliability and up-time.
